

**DEPARTMENT OF THE AIR FORCE
374TH AIRLIFT WING**

COVID-19 Community Update 10 September 2021

**Sixteen individuals in the Yokota community tested positive for COVID-19 4 Sep - 10 Sep.
The current number of active cases at Yokota is 21.**

Two individuals had been in post-travel Restriction of Movement (ROM) upon entry into Japan from the United States when the individuals received results from a PCR test. The patients followed USFJ ROM policy and went directly into ROM status once the individuals arrived to Japan.

Due to aggressive contact tracing and notification procedures, another 9 were already placed in quarantine as close contacts of a previously identified positive case.

The five remaining individuals were identified and quarantined by Public Health according to strict Centers for Disease Control and Prevention guidance.

Public Health has notified all close contacts of the COVID positive individuals and appropriate actions have been taken. The patients are currently in isolation under supervision by medical providers.

If you are experiencing possible COVID-19 symptoms (fever, cough, difficulty breathing, chills, muscle aches, fatigue, headache, sore throat, stuffy nose, nausea, vomiting, diarrhea, or sudden loss of taste and smell), DO NOT go to work or expose others. Call the medical appointment line at DSN: 225-8864 Opt. 7 or Cell: 042-552-2510 Ext. 58864 Opt. 7 for evaluation and instructions. For questions about ROM, please utilize your chain of command.
